

Core Competencies

Safety Engineering International (SEI) supports the global transportation community in its mission to save lives, prevent injuries and reduce traffic-related health care and other economic costs through the use of **vehicle enhancement and reinforcement products** that protect occupants during crash events.

- **SEI's** patented rollover occupant protection system, **HALO**, has saved hundreds of lives in the mining industry over 12 years throughout 5 continents. **NOW available on GSA Advantage!**
- **HALO** is the state-of-the-art in rollover safety cage systems. HALO enhances and reinforces the vehicle structure to minimize serious and fatal injuries to occupants in crash events.
- **HALO** can be designed for any vehicle and can combine with other vehicle modifications like lift kits or armor plating.

Differentiators

- ✓ HALO is the only stand-alone Light Truck ROPS on GSA.
- ✓ HALO is proven with thousands already in use.
- ✓ Hundreds of lives saved in HALO equipped vehicles. Real-World success stories on our website.
- ✓ SEI design engineers have 20+ years' experience.
- ✓ SEI team has extensive knowledge of accident investigation and dynamic vehicle testing; 300 test crashes run on the JRS.
- ✓ 13 HALO models on GSA Advantage including Ford, Toyota, Isuzu, Mitsubishi, and Mahindra.
- ✓ Certified HALO Installers are ready and available to move quickly to complete the job on time.
- ✓ Special order designs available for ANY vehicle or transport.

Company Data

Safety Engineering International, LLC. (SEI)
